

Xencore IT Sourcing & Nearshoring Solutions

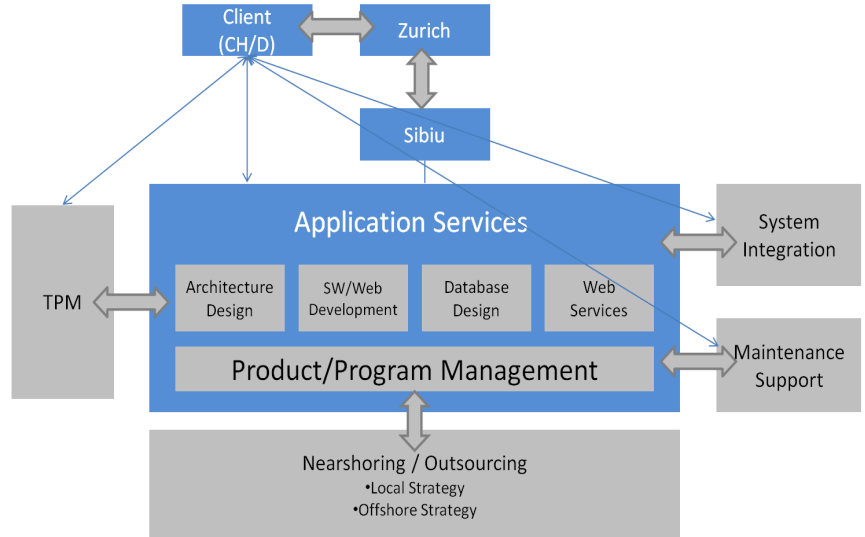

Bridge the Gap — Nearshore to Sibiu, Romania

Xencore specialises in IT sourcing, outsourced software development and managed services. We assist you with your local IT strategy by having local IT competency available to discuss your local business and technological needs.

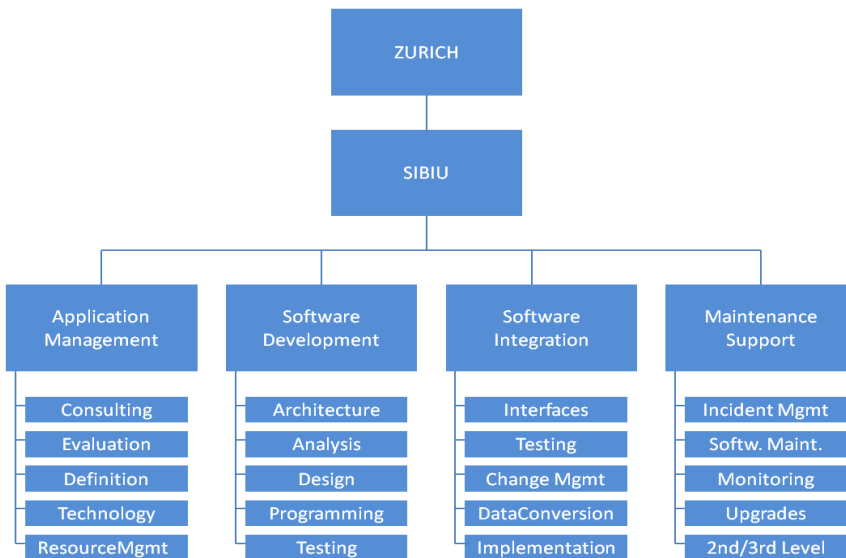

We partner with you from proposals and budgeting, project analysis and design through to delivery, training, maintenance and support.

You know your business best and we know how to size, plan, build and deliver successful quality applications on-time and within budget.

Turning Nearshoring into Value

Our software developers in Sibiu, Romania are specialised in the following areas:

Affordable software development made simple!

Xencore entered into a partnership with SAG Informatik AG, a 100% subsidiary of SAG Holding, Cham ZG, ca. 550 Mio Annual Revenue, ca. 1660 employees, to develop state-of-the-art software and web solutions offshore.

A software development center was founded in 2006 in Sibiu, Romania for large, small and medium size enterprises (SMEs) who seek to minimize costs and to maximize quality.

In our experience, outsourcing software development projects successfully requires good communication. Our team uses the project management web application tool, Redmine, to communicate and manage projects seamlessly, ensuring visibility, security and quality.
